

LSI
2021

EMERGING MEDTECH SUMMIT

The Ritz-Carlton | Laguna Niguel, CA | May 11-13

LSI2021 Health & Safety Plan

The safety of our attendees is our most important priority.

Requirements for Entry

-  Attendees have either certified that they've been vaccinated against COVID or they can take a rapid test, on-site at the event.
-  Temperature checks will be required upon entry of the event, each day, for every attendee.
-  A COVID screener will need to be completed by each attendee prior to entering the event.
-  If there are any concerns from the screening questionnaire or symptoms, on-site Medical Director Jared Williams, MD will evaluate, diagnose and administer a COVID rapid test if appropriate.

General Safety Plan & Guidelines

-  Masks will be required in all common areas and sessions.
-  All seating will be arranged in socially distanced format.
-  All LSI staff staff will go through COVID screening and temperature checks on a daily basis.
-  Seating will be spread out and abundant in both indoor and outdoor settings with event streaming available from any location on the property.

QUANTGENE

Stay Safe While You Innovate.

Quantgene is proud to be the official Covid Safety Sponsor for LSI's Emerging Medtech Summit.

The Leading 24-Hour COVID Testing System

Quantgene is a leader in COVID testing amongst high-value businesses including entertainment productions and manufacturing. They deliver guaranteed 24-hour RT-PCR results via their proprietary fully-integrated COVID testing platform and laboratory infrastructure.

- FDA-EUA authorized
- CDC gold standard RT-PCR testing
- Comfortable mid-nasal format
- Results in less than 24hours

Quantgene's Mission

10 in 10

To extend the healthy human lifespan by a decade, within a decade.

About Quantgene

Quantgene is a biotechnology company focused on unlocking the deep human genome. They combine next-generation genomic sequencing, with AI and cloud technologies to innovate the future of medicine. Quantgene's flagship product, Serenity, is a system of advanced medical intelligence using liquid biopsy, whole-exome sequencing and dynamic health profiles. Serenity medical experts use this advanced genomic technology to detect early signals of cancer and other diseases when they are easiest to treat.

For more information on Quantgene and our Serenity mission visit our website or connect with us here at LSI2021 Emerging Medtech Summit through the partnering application.

We look forward to meeting with you.
